Specification Summary

Brand	Codelocks
Product type	CL200 Series

Product Description

The CL0255 Marine By Codelocks Digital Lock with Key Override is a premium, light-duty mechanical lock engineered to withstand the harshest outdoor environments. Featuring a durable marine-grade black finish and protective neoprene seals, this lock has been salt spray tested to 1,000 hours, making it ideal for coastal installations, external gates, and exposed doors.

Operation is simple and secure. The inside lever handle provides free exit at all times, while entry from the outside requires either a correct code entry or the use of the key override. The front knob houses a key override cylinder, allowing quick access with one of the three supplied keys.

This digital lock is available in multiple configurations, including standard and fire-tested variants, with varying weights, manufacturer references, and included accessories. Please select your preferred option from the choices below.

Technical Specifications

- **Brand:** Codelocks
- **Model:** CL0255 Marine
- **Finish:** Black with stainless steel buttons
- **Code Length:** 4 to 6 digits (up to 8,191 non-sequential combinations)

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
