Specification Summary

Brand	Codelocks
Product type	CL400 Series

Product Description

The CL0400 Marine by Codelocks digital lock series features medium-duty, lever-operated mechanical locks designed specifically to withstand harsh outdoor and coastal environments. Salt spray tested to 1,000 hours and supplied with neoprene seals, this robust lock is ideal for workspaces, gates, and external doors where standard locks might succumb to corrosion.

The lock features a sleek black finish with 14 stainless steel buttons, offering up to 8,191 non-sequential code combinations. It is designed for doors with a thickness of 35mm to 65mm and comes with a 60mm tubular mortice latch.

This digital lock is available in several configurations to suit your specific needs. You can choose options with or without a passage set (for code-free entry), and with or without fire testing (supplied with a Fire Kit Pack). The manufacturer references, weights, and barcodes vary depending on the model selected. Please choose your required options from the selection below.

Technical Specifications

- **Brand:** Codelocks
- **Backset:** 60mm
- **Case Depth Required:** 85mm
- **Code Length:** 4 to 6 digits
- **Combinations:** 8,000+ (8,191 non-sequential combinations)
- **Door Thickness:** 35mm to 65mm
- **Finish:** Black
- **Handing:** Reversible
- **Latch:** 60mm tubular mortice latch
- **Operation Inside:** Lever handle free exit
- **Operation Outside:** Lever handle on entry of code
- **Weather Resistant:** Yes
- **Fire Tested:** Yes or No (please choose from the options below)
- **Passage Set:** Yes or No (please choose from the options below)
- **Weight:** 1.484kg to 1.61kg (please choose from the options below)
- **Manufacturer Reference:** Multiple options available (please choose from the options below)

Key Features

- **Marine Grade Protection:** Salt spray tested to 1,000 hours and supplied with neoprene seals for harsh outdoor and coastal environments.
- **Medium-Duty Lever Operation:** Features full-size return-to-door lever handles, ideal for environments where a knob-operated lock is unsuitable.
- **Code-Free Passage Option:** Available on select models to allow unrestricted access when required.
- **Fire Rated Options:** Available with a Codelocks Fire Kit Pack, tested to BS EN 1634-1 for 30 or 60-minute fire doors.
- **Easy Code Changes:** Features tumbler alignment for straightforward code changes off the door.
- **Limited Lifetime Guarantee:** Backed by Codelocks' limited lifetime guarantee.

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
