Specification Summary

Brand	Codelocks
Product type	CL500 Series

Product Description

The CL0500 PK MB from the Marine by Codelocks 500 series is a heavy-duty, lever-operated digital lock front designed specifically to work with single-point panic pads or exit bars. Supplied as a front digital plate only, it features an extra-long spindle that connects directly to your existing panic hardware, allowing authorised entry from the outside via a coded lever handle.

Built to withstand the harshest environments, this marine-grade lock is finished in a durable black coating with stainless steel buttons. It has been salt spray tested to 1,000 hours and comes complete with neoprene seals,

making it an excellent choice for coastal installations, external gates, and demanding outdoor applications.

The lock is fully reversible and accommodates doors between 35mm and 65mm thick. It offers over 8,000 non-sequential code combinations (4 to 6 digits) with tumbler alignment for straightforward code changes. For fire-rated installations, it can be paired with Codelocks Fire Kit Packs to suit 30 or 60-minute timber fire doors (tested in accordance with BS EN 1634-1).

Please note: This product is the front plate only; the panic latch is not supplied. Please ensure your existing panic hardware is compatible before purchasing.

Technical Specifications

- **Brand:** Codelocks
- **Manufacturer Reference:** 0500 PK BK MG
- **Finish:** Black (Marine Grade)
- **Buttons:** 12
- **Code Length:** 4 to 6 digits
- **Combinations:** 8,000+
- **Door Thickness:** 35mm to 65mm
- **Handing:** Reversible
- **Key Override:** No
- **Holdback:** No
- **Passage Set:** No
- **Latch:** Not supplied
- **Width:** 48mm
- **Weight:** 1.46kg

Key Features

- **Panic Latch Integration:** Supplied with an extra-long spindle to operate most single-point panic pads or bars from the outside.
- **Marine Grade Durability:** Salt spray tested to 1,000 hours and supplied with neoprene seals, making it ideal for harsh outdoor and coastal environments.
- **Heavy-Duty Operation:** Robust lever handle designed for high-traffic internal or external doors.
- **Secure Access:** Supports 4 to 6-digit codes with over 8,000 non-sequential combinations and easy code changes.
- **Fire Door Compatible:** Can be fitted with Codelocks Fire Kit Packs for 30 or 60-minute timber fire doors (tested to BS EN 1634-1).
- **Reversible Handing:** Non-handed design allows for easy installation on both left and right-handed doors.

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
