Specification Summary

Brand	Codelocks
Product type	CL500 Series

Product Description

The CL0510 MB Back To Back Digital Lock from the Marine by Codelocks 500 series is a heavy-duty mechanical lock engineered for high-traffic internal and external applications. Featuring two coded keypads, this lock provides secure, coded access in both directions, making it ideal for restricted perimeters, gates, and commercial doors.

Designed to withstand the harshest outdoor conditions, the lock features a durable black marine-grade finish with stainless steel buttons and has been salt spray tested to 1,000 hours. It comes complete with neoprene seals to protect against moisture and coastal environments. The heavy-duty, spring-loaded, anti-shim tubular mortice latch locks automatically when the door is closed, and the latch is easily retracted from either side upon entering the correct code.

With up to 2,047 non-sequential code combinations and tumbler alignment for straightforward code changes, this lock offers flexible and robust access control. For fire door applications, it can be fitted with Codelocks Fire Kit Packs to suit 30 or 60-minute fire doors (tested in accordance with BS EN 1634-1:2008).

Technical Specifications

- **Brand:** Codelocks
- **Series:** CL500 Series (Marine by Codelocks)
- **Finish:** Black with stainless steel buttons
- **Latch:** 60mm heavy-duty anti-shim tubular mortice latch
- **Backset:** 60mm
- **Case Depth Required:** 85mm
- **Door Thickness:** 35mm to 65mm
- **Code Length:** 4 to 6 digits
- **Combinations:** Up to 2,047 non-sequential combinations
- **Handing:** Reversible (non-handed)
- **Weather Resistant:** Yes (salt spray tested to 1,000 hours)
- **Fire Rated:** Suitable for 30 or 60-minute fire doors when fitted with an appropriate Codelocks Fire Kit Pack (tested to BS EN 1634-1:2008)
- **Dimensions:** 177mm (H) x 48mm (W)

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
