Specification Summary

Brand	Codelocks
Product type	CL500 Series

Product Description

The CL510 Marine by Codelocks is a heavy-duty mechanical digital lock designed to withstand harsh outdoor environments, coastal applications, and high-traffic areas. Featuring a specialized black marine-grade finish, this lock has been rigorously salt-spray tested to 1,000 hours to resist moisture and corrosion. It comes complete with neoprene seals, making it highly durable for both internal and external installations.

The lock is suitable for doors with a thickness of 35mm to 60mm and features a non-handed design, allowing it to be fitted on either left- or right-hand hung doors. It offers over 2,000 non-sequential code combinations and features a tumbler alignment mechanism for straightforward code changes. The mortice latch is equipped with an 'anti-shim' plunger for enhanced security.

This versatile digital lock is available in multiple configurations to suit your specific installation requirements. You can choose whether you require a passage set (providing a code-free entry option for unrestricted access during busy periods) or a standard lock without a passage set. Multiple manufacturer references (0510 BK MG and 0515 BK MG) and barcodes are available. Please select your preferred passage set option, manufacturer reference, and barcode from the options below.

Technical Specifications

- **Brand:** Codelocks
- **Door Thickness:** 35mm to 60mm
- **Finish:** Black Marine Grade
- **Handing:** Non-handed
- **Combinations:** 2,000+ non-sequential combinations
- **Fire Tested:** No
- **Passage Set:** Yes or No options available (please choose from the options below)
- **Manufacturer Reference:** 0510 BK MG or 0515 BK MG (please choose from the options below)
- **Barcode:** Multiple options available (please choose from the options below)

Key Features

- Rigorously salt-spray tested to 1,000 hours for superior corrosion resistance
- Specially enhanced marine-grade black finish ideal for coastal and harsh outdoor environments
- Complete with neoprene seals for weather protection
- Heavy-duty construction suitable for high-traffic internal or external doors
- Mortice latch with 'anti-shim' plunger for added security
- Tumbler alignment for easy code changes
- Optional passage set (code-free) function available on selected models

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
