Product Description

The CODELOCKS A3 Dual Vandal Resist Stand Alone Door Controller with RFID is a robust, surface-mounted keyless entry solution designed to provide secure, flexible access control without the need for complex software, external programming, or licensing costs. Ideal for small to medium-sized commercial premises, this heavy-duty standalone controller supports up to 600 code or card clients, offering convenient proximity access via MIFARE® compatible cards or keyless entry using the keypad.

Engineered to withstand harsh environments, the controller features a durable vandal-resistant design and conforms to an IP66 rating, making it suitable for both internal and external installations. For enhanced security, it includes an anti-tamper sensor and a configurable penalty time to prevent unauthorised code-guessing. Additionally, the unit can be connected to doorbell and alarm systems for integrated security management.

An optional "Clean by Codelocks" photocatalytic finish is available to special order, featuring an ISO-certified coating that reduces bacterial growth by up to 99.96% and provides enhanced protection against viruses and environmental toxins.

Technical Specifications

- **Brand:** Codelocks
- **Finish:** Silver
- **IP Rating:** IP66 (suitable for internal and external use)
- **User Capacity:** Up to 600 code/card clients
- **Compatibility:** RFID MIFARE® compatible
- **Mounting:** Surface mounted
- **System Type:** Standalone
- **Weight:** 437g

Key Features

- **Dual Access Methods:** Supports both proximity card entry and keypad code entry for flexible, keyless access.
- **Vandal Resistant & Heavy Duty:** Robust construction designed to withstand physical tampering and harsh environments.
- **No Software Required:** A standalone solution requiring no external programming, complex software, or ongoing licensing fees.
- **Enhanced Security:** Features an integrated anti-tamper sensor and configurable penalty times to deter unauthorised access attempts.
- **Weatherproof Design:** Conforms to an IP66 rating, ensuring reliable performance in both indoor and outdoor installations.
- **Auxiliary Connections:** Compatible with doorbell and alarm connections for integrated security setups.
- **Optional Clean by Codelocks Finish:** Available to special order with an ISO-certified photocatalytic coating to reduce bacterial growth.

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
