Specification Summary

Brand	Codelocks
Product type	CL0460 Series

Product Description

The Codelocks CL0460 Series is a medium-duty, narrow stile mechanical digital lock designed specifically for aluminium doors. It offers an affordable, reliable alternative to electronic keypads, electric strikes, and magnetic locks on aluminium-framed doors. Ideal for both new installations and retrofitting, it is designed to fit seamlessly with Adams Rite or similar style ANSI round cylinder mortice deadlatches.

This versatile series is available in multiple configurations to suit your specific security and access requirements. Please choose from the options below to select your preferred mechanism (either a Threaded Screw-In Cylinder or a Euro Cylinder) and decide whether you require a passage set (code-free access) function. The CL460 model features a screw-in cylinder without a passage set, while the CL475 model features a Euro cylinder with a code-free passage function.

Equipped with full-size return-to-door lever handles and a protective clutch mechanism, the CL0460 series is built for durability and ease of use. It is fully reversible (non-handed) for straightforward installation on both left and right-hand hung doors. The PVD weather-resistant satin chrome finish ensures long-lasting performance in both internal and external environments.

Technical Specifications

- **Brand**: Codelocks
- **Door Thickness**: 45mm to 55mm
- **Case Depth Required**: 44mm
- **Backset**: Variable
- **Key Override**: Yes (supplied with 3 keys)
- **Code Length**: 1 to 7 digits (over 8,000 combinations)

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
