Brand	Codelocks
Product type	CL100 Series

Product Description

The **Codelocks CL100 Series Surface Deadbolt Digital Lock** is an entry-level mechanical push-button lock designed to provide reliable, light-duty access control. It is an ideal security solution for inner office doors, storage rooms, and cupboards in commercial premises, as well as sheds, garages, and domestic cupboards. Offering excellent value for money, this mechanical lock operates without the need for keys or power.

This version is supplied with a surface-mounted deadbolt that slides on the inside of the door to lock or unlock. To gain entry from the outside, users simply enter the correct code and manually turn the outside knob. From the inside, the lock can be operated freely at any time using the thumbturn, ensuring a safe and quick exit.

Installation is straightforward, requiring only a few drilled holes for the spindle and fixing bolts. The lock is supplied with a random, unrecorded code that can be easily changed in minutes by following the clear instructions provided. Additionally, neoprene seals are included for both sides of the door to provide friction and protect the door surface from damage during installation.

An optional 'Clean by Codelocks' photocatalytic finish is also available to special order, providing enhanced protection against bacteria and environmental toxins.

Technical Specifications

- **Brand:** Codelocks
- **Manufacturer Reference:** CL100
- **Backset:** 60mm
- **Bolt Throw:** 43mm
- **Case Depth Required:** 80mm
- **Door Thickness Compatibility:** 35mm to 60mm
- **Code Length:** 5 to 7 digits
- **Number of Codes:** 1

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
