Specification Summary

Brand	Codelocks
Product type	Codelocks

Product Description

The Codelocks CL2255 is a medium-duty electronic digital lock designed to provide flexible and reliable access control. Featuring a tubular mortice latch, this battery-operated lock is ideal for upgrading from basic single-code mechanical locks, offering a rapid retrofit solution using existing fixing holes.

The lock operates with a free-turning outside knob that only engages to retract the latchbolt once a valid code is entered and the blue LED indicator lights up. When the door closes, the spring latch automatically relocks. For convenience, the CL2255 features an on-door programming keypad that allows management to store up to 80 unique user codes (4 to 6 digits) and configure a Code Free passage mode. A key override is included as standard, supplying two keys for manual entry or management functions.

This lock is available in both standard and fire-tested configurations. The fire-tested model is tested to BS EN 1634-1 and is supplied complete with an optional fire holdback kit. Please select your preferred fire-tested status, manufacturer reference, weight, and barcode from the options below.

Technical Specifications

- **Brand:** Codelocks
- **Mechanism:** Electronic Digital
- **Backset:** 60mm
- **Latch:** 60mm Standard
- **Door Thickness:** 35mm to 65mm
- **Case Depth Required:** 85mm
- **Width:** 41mm
- **Buttons:** 10
- **Code Length:** 4 to 6 digits
- **Combinations:** 1,000,000+
- **User Codes:** Up to 80
- **Battery:** 2 x AA (providing up to 80,000 operations)
- **Key Override:** Yes (supplied with 2 keys)
- **Handed:** Reversible
- **Finish:** Steel
- **Weather Resistant:** Yes
- **Fire Tested:** Available as fire-tested (BS EN 1634-1) or non-fire-tested (please choose from the options below)
- **Weight:** 1.199kg or 1.28kg (please choose from the options below)
- **Manufacturer Reference:** 2255BS or 2255 BS FKP (please choose from the options below)
- **Barcode:** 5031913002848 or 5031913008468 (please choose from the options below)

Key Features

- **On-Door Programming:** Easily program codes and functions via the keypad in seconds using the Master Code.
- **Flexible Access Control:** Supports up to 80 different user codes of 4, 5, or 6 digits.

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
