Specification Summary

Brand	Codelocks
Product type	CL400 Series

Product Description

The Codelocks CL410 is a medium-duty mechanical digital lock from the CL400 series, featuring a tubular mortice latch and full-size lever handles. It is an ideal security solution for both internal and external doors where a knob-operated lock is not suitable.

The outside lever handle retracts the latchbolt only after a correct code is entered, and the spring-loaded latchbolt locks automatically when the door is closed. For safety and convenience, the inside lever handle provides free exit at all times. Built for durability, it features a protective clutched handle mechanism to prevent damage from forced entry, alongside a weather-resistant finish.

This lock is available in both standard and fire-tested versions (tested to BS EN 1634-1). Please choose your preferred fire-tested option, manufacturer reference, and weight from the options below.

Technical Specifications

- **Brand:** Codelocks
- **Backset:** 60mm
- **Case Depth Required:** 85mm
- **Door Thickness:** 35mm to 65mm
- **Buttons:** 14
- **Code Length:** 4 to 6 digits
- **Combinations:** 8,000+
- **Handing:** Reversible
- **Finish:** Stainless Steel
- **Fire Tested:** Yes or No (please choose from the options below)
- **Standards:** BS EN 1634-1 (fire-tested option only)
- **Inside Operation:** Lever handle free exit
- **Outside Operation:** Lever handle on entry of code
- **Width:** 41mm
- **Weight:** 1.492kg to 1.494kg (please choose from the options below)

Key Features

- **Medium-Duty Latch:** Sturdy mechanical tubular mortice latch with full-size lever handles.
- **Automatic Locking:** Outside lever retracts the latch after code entry, locking automatically when closed.
- **Free Exit:** Inside lever handle provides free exit at all times.
- **Clutched Handle:** Protective clutched mechanism helps prevent damage from forced entry.
- **Weather Resistant:** Durable PVD stainless steel finish suitable for indoor and outdoor use.
- **Code-Free Entry:** Optional passage set function for unrestricted access when required.
- **Reversible Handing:** Non-handed design suitable for both left and right-handed doors.
- **Fire-Tested Options:** Available in standard or fire-rated versions (please select from the options below).

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
