Specification Summary

Brand	Codelocks
Product type	CL500 Series

Product Description

The Codelocks CL510 Series is a heavy-duty mechanical digital lock designed for high-traffic internal and external doors. Equipped with a robust tubular mortice latch, this lock provides reliable security and ease of use. The outside lever handle retracts the latch once a correct code is entered, and the spring-loaded latchbolt locks automatically when the door is closed, while the inside lever handle provides free exit at all times.

This series is available in two models to suit your requirements. The CL510 model offers standard coded entry, while the CL515 model features a passage set (code-free entry) option, allowing free passage without a code when required. Please select your preferred model, passage set option, and barcode from the choices below.

To achieve a fire rating, these digital locks must be fitted with an appropriate intumescent pack (available separately). Additionally, the optional "Clean by Codelocks" photocatalytic finish is available to special order to help reduce bacterial growth.

Please note: If you are ordering a front/back plate set to use with an existing lock case, please ensure your current lock case is tested for compatibility before purchasing.

Technical Specifications

- **Brand:** Codelocks
- **Manufacturer Reference:** 510 or 515 (please choose from the options below)
- **Passage Set:** Yes or No (please choose from the options below)
- **Barcode:** 5031913000837 or 5031913000844 (please choose from the options below)
- **Backset:** 60mm
- **Case Depth Required:** 85mm
- **Door Thickness:** 35mm to 65mm
- **Finish:** Stainless Steel
- **Buttons:** 12
- **Code Length:** 4 to 6 digits
- **Combinations:** 8,000+
- **Handing:** Reversible (non-handed)
- **Spindle:** 8mm square spindle
- **Width:** 48mm
- **Weight:** 2.14kg

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
