Specification Summary

Brand	Codelocks
Product type	CL500 Series

Product Description

The Codelocks CL520 Series is a heavy-duty mechanical digital lock designed for both internal and external doors. It features a robust Euro profile mortice sash lock with a double cylinder, three keys, and a split follower safety mechanism. This anti-panic safety feature allows the inside lever handle to retract both the deadbolt and the latchbolt simultaneously, preventing accidental lock-ins and ensuring a safe means of escape.

The outside lever handle retracts the latch once a correct code is entered, and the spring-loaded latchbolt locks automatically when the door is closed. For added security, the key can be used to control the deadbolt position (which denies access to code users when projected) or to retract the latchbolt for key-only entry.

This versatile series is available in multiple configurations, including options with or without a passage set (code-free entry option), and fire-tested versions (compliant with BS EN 1634-1 and CE marked, supplied with a fire pack). Please choose your preferred options from the selections below.

Important Compatibility Note: Before ordering a Codelocks front/back plate set for use on an existing lock case, please ensure your current lock case is fully compatible.

Technical Specifications

- **Brand:** Codelocks
- **Backset:** 55mm
- **Case Depth Required:** 85mm
- **Door Thickness:** 35mm to 65mm
- **Finish:** Stainless Steel
- **Code Length:** 4 to 6 digits
- **Combinations:** 8,000+
- **Key Override:** Yes (supplied with 3 keys)
- **Handing:** Reversible

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
