Product type	Codelocks

Product Description

The Codelocks CL5510 Smart Lock is a heavy-duty, Bluetooth-enabled electronic digital lock designed to bring advanced access control and convenient smartphone management to your premises. Using the K3 Connect App (compatible with iOS and Android), building managers can easily program the lock, generate access codes, distribute smart cards, and track audit trails directly from a smartphone.

This versatile smart lock supports up to 350 users, offering multiple entry options including 100 user codes, 150 MIFARE® smart cards (or fobs/wristbands), and 100 phone clients. For enhanced security and temporary access, the CL5510 features Codelocks' innovative NetCode technology. This allows you to generate timed access codes with a specific start date and duration, which can be sent via email or SMS and automatically expire after use.

With additional features like scheduled 'code-free' periods, a backlit 12-button keypad, and a key override with two keys supplied, the CL5510 provides a highly flexible and secure solution for busy commercial environments.

Technical Specifications

- **Brand:** Codelocks
- **Model:** CL5510
- **Power Supply:** 4 x AA batteries (approx. 1-year battery life)
- **Backset:** 60mm
- **Latch:** 60mm standard latch
- **Case Depth Required:** 95mm
- **Door Thickness:** 35mm to 65mm
- **Body Dimensions:** 198mm (H) x 70mm (W)
- **Spindle:** 8mm
- **Body Material:** Zinc Alloy
- **Finish:** Satin Stainless Steel
- **Keypad:** 12-button backlit keypad
- **Code Length:** 4 to 6 digits (NetCode is 6 digits)
- **User Capacity:** Up to 350 users (100 user codes, 150 smart cards, 100 phone clients)
- **Handing:** Reversible
- **Key Override:** Yes (2 keys supplied)

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
