Brand	Codelocks
Product type	Codelocks

Product Description

The CODELOCKS Kitlock KL10 Code Retrieval Key is an essential master key designed specifically for the Codelocks Kitlock KL10 Mechanical Lock. It provides a reliable code retrieval function, allowing facility managers, school administrators, and office supervisors to easily find a forgotten user code or gain emergency access to locked cabinets, lockers, and cupboards.

Using the key is simple and straightforward. With the lock in the locked position, insert the key and turn it 90 degrees clockwise. Gently rotate each of the four dials upwards until they stop; the numbers shown will reveal the current combination. Once retrieved, turn the key 90 degrees anticlockwise to remove it. This ensures you maintain access control and resolve lockouts quickly without needing to force or damage the lock.

Technical Specifications

- **Brand:** Codelocks
- **Manufacturer Reference:** KL10KEY
- **Part Number:** L30650
- **Key Number:** 232

- **Compatibility:** Designed to suit Codelocks Kitlock KL10 Mechanical Lock

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
