Specification Summary

Brand	Codelocks
Product type	Codelocks

Product Description

The Codelocks KitLock KL1000 Classic with Slam Latch is a quick and efficient retrofit solution for standard keyed cam locks on lockers, cabinets, and cupboards. It is also straightforward to install on units without existing locks, providing immediate, keyless keypad access.

This battery-operated digital lock comes complete with an internal slam latch, enabling fast 'push shut' closure without needing to turn the handle to lock. Powered by two AAA batteries (included), it delivers up to 15,000 operations and features a low battery warning. In the event of battery failure, a 9V battery override can be used against the external contacts to gain access.

The KL1000 offers both Private and Public functions, making it highly versatile for personal lockers, hot-desking, or shared gym facilities. It features an 11-button keypad and supports a 4-digit User Code, alongside Master, Sub-Master, and Technician codes.

Technical Specifications

- **Brand:** Codelocks
- **Manufacturer Reference:** 1000 SG SL
- **Power Supply:** 2 x AAA batteries (included)
- **Battery Life:** Up to 15,000 operations
- **Code Length:** 4-digit User Code (8-digit Master/Sub-Master, 6-digit Technician)

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
