Specification Summary

Brand	Codelocks
Product type	Codelocks

Product Description

The CODELOCKS Kitlock KL1000 G3 Battery Operated Digital Cabinet Lock is a compact and versatile keyless access control solution designed for lockers, cupboards, and cabinets. This third-generation digital lock is ideal for a wide range of environments, including schools, offices, leisure facilities, and healthcare settings.

This lock offers both Private and Public operating modes. In Private Function, it supports up to 20 unique 4-digit User Codes, allowing multiple authorised users to access a single cabinet. In Public Function, it is perfect for short-term, multi-occupancy use and features an auto-unlock countdown timer (1 to 24 hours) to save valuable management time.

Designed for ease of use, the KL1000 G3 features a convenient front-facing battery compartment, allowing the 2 x AAA batteries to be replaced without removing the lock from the door. It also includes a key override function (override key available separately under code L32464) and an external battery override contact point for emergency access.

This lock is available in multiple finishes, including Satin Chrome and Black & Silver, with corresponding manufacturer references (1000 G3 SC and 1000 G3 BC). Please choose your preferred finish and option from the selection below.

Technical Specifications

- **Power Supply:** 2 x AAA batteries
- **Battery Life:** Up to 100,000 operations
- **Door Thickness:** Up to 25mm
- **Code Length:** 4 digits
- **Key Override:** Yes (override key sold separately)
- **Handing:** Non-handed
- **Operation Outside:** Thumbturn on entry of code
- **Operation Inside:** Cam lock
- **Finishes:** Available in Satin Chrome or Black & Silver (please choose from the options below)
- **Manufacturer References:** 1000 G3 SC or 1000 G3 BC (please choose from the options below)

Key Features

- **Dual Functionality:** Supports both Private and Public operating modes to suit single or multi-user applications.
- **On-Door Battery Change:** Front-facing battery compartment allows quick and easy replacement of the 2 x AAA batteries.
- **Auto-Unlock Function:** Can be programmed to automatically unlock after a set period (1 to 24 hours) in Public mode.
- **Key Override:** Manual key override capability for emergency access (key available separately under code L32464).
- **Battery Failure Override:** External contact points allow emergency power using a 9V PP3 battery if internal batteries fail.
- **Easy Retrofit:** Designed to easily replace standard mechanical cam locks.
- **Supplied Accessories:** Includes both flat and cranked cams for versatile installation.
- **Low Battery Warning:** Red LED indicator flashes to signal when batteries need replacing.

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
