Product Description

The CODELOCKS KitLock KL1100 KeyPad Locker Lock with Powered Latch is a stylish, slimline standalone digital lock designed for modern locker and cabinet applications. It combines a traditional, familiar 11-button keypad interface with advanced features, including a powered latch for effortless push-to-close locking.

Ideal for both new installations and retrofitting existing lockers, the KL1100 is non-handed and suitable for indoor use on doors up to 25mm thick. It features an easy-to-wipe surface that is compatible with anti-bacterial sprays and wipes, making it perfect for high-traffic environments such as gyms, offices, schools, and hospitals.

The lock supports both Private and Public functions, offering up to 20 user codes and up to 100,000 operations. It also features auto-unlocking capabilities alongside convenient on-door programming and battery changes.

This lock is available in multiple finishes, including Black and Silver, with different manufacturer references and barcodes. Please choose your preferred options from the selection below.

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
