Product type	Combination

Product Description

The CODELOCKS Kitlock KL15 Public Function Mechanical Combination Lock is a robust, keyless access solution designed for shared lockers and cabinets in high-traffic environments. Ideal for short-term, multiple-occupancy applications, this mechanical lock allows users to enter a temporary four-digit code to lock the unit. The same code is entered once to open it, leaving the lock unlocked and ready for the next user.

With its versatile design, the KL15 can be flush-fitted for a sleek, low-profile finish or surface-mounted using the included trim plate. It features a durable anti-vandal handle and a code retrieval function, which allows a master key (sold separately) to recover forgotten codes by rotating the dials until they click into place.

This lock is available in both horizontal and vertical fittings, with left-handed, right-handed, or non-handed configurations to suit your specific door requirements. Please select your preferred options from the drop-down menu below.

Technical Specifications

- **Brand:** Codelocks
- **Mechanism:** 4-wheel mechanical combination
- **Code Length:** 4 digits
- **Combinations:** 10,000 possible codes
- **Function:** Public (multiple occupancy)

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
