Brand	Codelocks
Product type	Combination

Product Description

The CODELOCKS KitLock KL20 Vertical Mechanical Combination Lock offers a simple, robust, and completely keyless security solution for personal storage. Finished in a durable black powder coating, this flush-mounted lock is ideal for internal applications, including lockers, cabinets, and cupboards in offices, schools, and colleges.

Designed with user convenience and security in mind, the KL20 features an innovative auto-scramble function. Upon operation, the dials automatically reset to 0-0-0-0, ensuring your 4-digit code remains hidden from onlookers. With over 10,000 unique combinations available, users can easily program and change their code directly on the

door at any time.

Installation is straightforward, making the KL20 perfect for both new installations and retrofitting existing standard mechanical cam locks. It features a fixed spindle suitable for door panel thicknesses ranging from 0.8mm up to 18mm, and is supplied with a 40mm cam.

Technical Specifications

- **Brand:** Codelocks
- **Model Reference:** KL20 BK (0020 BK)
- **Finish:** Black
- **Combination:** 4-digit (over 10,000 unique combinations)
- **Cam Height:** 40mm

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
