Specification Summary

Brand	Codelocks
Product type	Codelocks

Product Description

The CODELOCKS KitLock P1000SL Slam Latch is a practical accessory designed for use with the KL1000 digital cabinet lock series. By enabling a fast and convenient 'push shut' locking action, it eliminates the need to manually turn the lock handle to secure a cabinet or locker.

This durable slam latch is highly versatile, making it an excellent choice for both new installations and retrofitting existing setups. It is fully adjustable and non-handed, allowing for easy fitting on both left- and right-handed doors. Suitable for use on wooden and steel lockers or cabinets with a door thickness of up to 25mm, it is ideal for upgrading storage in schools, offices, and leisure facilities.

Technical Specifications

- **Brand:** Codelocks
- **Manufacturer Reference:** P1000 SL
- **Door Thickness:** Up to 25mm
- **Finish:** Silver Grey
- **Weight:** 160g
- **Pack Quantity:** 1

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
