Specification Summary

Brand	Codelocks
Product type	Codelocks

Product Description

The Codelocks KL1200 is a robust, battery-operated digital cabinet lock designed as a quick retrofit for standard keyed cam locks on lockers, cabinets, and cupboards. It can also be easily fitted to units without existing locks, providing immediate keypad access without the hassle of keys.

Compared to the KL1000, the KL1200 offers enhanced durability and functionality, featuring stainless steel buttons, dual fixing points, additional programming features, and an increased battery life of up to 50,000 operations. It is constructed from a tough zinc alloy and is suitable for a wide range of light-duty applications in leisure centres, schools, offices, and shared workspaces.

The lock supports multiple user levels, including Master, Sub-Master, User, and Technician codes, and can be set to either Private Use (for dedicated users) or Public Use (for short-term locker use). It features a low battery warning and a battery override system using a 9V PP3 battery.

This lock is available in multiple finishes, including Black and Silver Grey. Please choose your preferred finish and manufacturer reference from the options below.

Technical Specifications

- **Brand:** Codelocks
- **Material:** Zinc Alloy
- **Power Source:** 2 x AAA batteries (included)
- **Battery Life:** Up to 50,000 operations
- **Keypad:** 11 buttons
- **Code Length:** 4 digits
- **Code Levels:** 4 (Master, Sub-Master, User, and Technician)
- **Dimensions:** 143mm (H) x 41mm (W) x 37mm (D)
- **Door Thickness:** Up to 25mm
- **Handing:** Reversible
- **Mechanism:** Electronic digital
- **Operation Outside:** Thumbturn on entry of code
- **Low Battery Warning:** Yes
- **Finishes:** Black or Silver Grey (please choose from the options below)

Key Features

- **Quick Retrofit:** Easily replaces standard keyed cam locks on lockers, cabinets, and cupboards.
- **Robust Construction:** Features stainless steel buttons and dual fixing points for enhanced durability compared to standard models.

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
