Specification Summary

Brand	Codelocks
Product type	Codelocks

Product Description

The Codelocks Mifare Smart Card Pack of 10 is designed to provide seamless, contactless access control for compatible Codelocks and KitLock smart locks. Operating on a 13.56MHz RFID frequency, these proximity cards offer a highly secure and convenient keyless entry solution, eliminating the need for physical keys or manual code entry.

Ideal for both private and public applications - such as offices, schools, leisure facilities, and shared workspaces - these smart cards are incredibly easy to assign and manage. They are fully compatible with Codelocks CL4510 and CL5510 electronic locks, as well as KitLock KL1050 and KL1550 cabinet locks.

Constructed for durability and everyday use, this pack of 10 cards is a cost-effective way to manage access credentials for multiple users or to keep spares on hand.

Technical Specifications

- **Brand:** Codelocks
- **Manufacturer Reference:** PMIFARE1KCARD
- **Frequency:** 13.56MHz RFID
- **Mechanism:** Proximity
- **Pack Quantity:** 10
- **Finish:** Black
- **Weight:** 59g
- **Barcode:** 5031913006983

Key Features

- **Keyless & Codeless Access:** Allows users to unlock doors or cabinets with a simple tap, removing the need for physical keys or remembering PIN codes.
- **Wide Compatibility:** Designed specifically for use with Codelocks CL4510, CL5510, KL1050, and KL1550 lock models.
- **Versatile Use:** Suitable for both private and public lock modes, making them ideal for commercial, educational, and leisure environments.
- **Convenient Multi-Pack:** Supplied in a pack of 10, perfect for multi-user setups or replacing lost credentials.
- **Battery-Free Operation:** Proximity cards do not require internal batteries, ensuring long-term reliability and zero maintenance.

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
