Specification Summary

Brand	Codelocks
Product type	Accessory

Product Description

The Codelocks PINGuard is a dual-purpose accessory designed to enhance PIN entry privacy whilst protecting your digital lock from harsh outdoor conditions. Made from a flexible, high-grade polymer, this shield fits securely behind the lock to improve the gasket seal and prevent water ingress.

By significantly reducing the effects of heavy rain and sub-zero temperatures, the PINGuard helps extend the operational lifespan of your digital lock. It is an ideal addition for external applications such as gates, sheds, outbuildings, and busy work sites. The shield can be easily fitted to both new and existing lock installations.

This product is available in multiple depths, weights, and packaging options to suit a wide range of Codelocks models, including the CL100, CL200, CL500, and CL4000 series. Please choose your required lock compatibility, depth, and reference option from the selection below.

Additionally, "Clean by Codelocks" is available as an optional finish to special order, featuring an ISO-certified photocatalytic coating that reduces bacterial growth by up to 99.96% and offers enhanced protection against environmental toxins.

Technical Specifications

- **Brand:** Codelocks
- **Finish:** Dark Grey
- **Depth:** 57mm to 71mm (please choose from the options below)
- **Weight:** 12g to 83g (please choose from the options below)
- **Manufacturer Reference:** PPGCL XT1, PPGCL XT2, or PPGCL XT3 (please choose from the options below)
- **Packaging:** Boxed or Loose (please choose from the options below)
- **Compatibility:** Suitable for various Codelocks series including CL100, CL200, CL500, CL600, CL4000, and CL5000 (please choose your matching lock model from the options below)

Key Features

- **Dual Protection:** Shields the keypad from onlookers for added PIN security whilst protecting the lock from adverse weather.
- **Weather Resistant:** Significantly reduces the effects of water ingress and sub-zero temperatures.
- **Durable Construction:** Made from a flexible, high-grade polymer that improves the gasket seal.
- **Extends Lock Life:** Protects the finish and internal components of external digital locks.
- **Versatile Application:** Ideal for gates, sheds, outbuildings, and external work sites.
- **Easy Installation:** Quick and simple to fit behind both new and existing lock installations.

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
