Specification Summary

Brand	Codelocks
Product type	Accessory

Product Description

The Codelocks Weather Cover (PWP) is a durable, protective casing designed to shield your digital locks from the elements. Ideal for external doors, gates, and outbuildings, this weather-resistant cover helps prevent damage from rain, dirt, and UV exposure, ensuring the long-term reliability and smooth operation of your lock.

Constructed from lightweight yet robust plastic with a clean grey finish, this protective cover fits seamlessly over the keypad. It is specifically designed to suit Codelocks CL100, CL200, and KL1000 series locks (please note that locks are sold separately, and this cover is not suitable for CL200 Key Override models). By shielding the lock face, it preserves the exterior finish and prevents moisture ingress, making it an essential accessory for any harsh or exposed environment.

Technical Specifications

- **Brand:** Codelocks
- **Manufacturer Reference:** PWP
- **Part Number:** L27584
- **Finish:** Grey
- **Material:** Plastic
- **Weight:** 123g
- **Pack Quantity:** 1
- **Compatibility:** Codelocks CL100, CL200 (excluding Key Override models), and KL1000 series

Brand Profile

Codelocks

Codelocks is a UK-headquartered access-control brand specialising in **keyless push-button locks** for **doors, lockers, cabinets and furniture**—the kind of hardware that's built to remove keys from the equation without dragging you into a full-blown wired access-control install. The company was **founded in 1991** and is based in **Newbury, Berkshire**, with a global footprint and multiple regional operations.

Their product family spans:

- **Mechanical digital locks** (purely mechanical keypad locks: no batteries, no wiring)
- **Electronic digital locks** (standalone battery-powered locks aimed at higher functionality and audit/control features)
- **Locker locks** under the **KitLock by Codelocks** name, targeting leisure, workplaces, education, and self-storage style installs

A signature differentiator is **NetCode®**: Codelocks' system for generating **time-sensitive access codes** (think "this code works from 2pm–6pm on Tuesday" rather than "this code works until the heat death of the universe"). NetCodes can be issued through the **Codelocks Connect portal** or related tools, making it popular for short-term access in things like **self-storage, rentals, shared facilities, and managed workplaces**.

On the "serious door" end, their **CL5000** line is positioned as **heavy-duty electronic locks for high-traffic applications** and is marketed with **ANSI Grade 2** testing references - very much the "commercial door that gets slammed 400 times a day" vibe.
