Specification Summary

Brand	Crompton
Product type	Catch & Latch

Product Description

The Crompton 0020-10 Suffolk Latch is a classic, traditional fastener designed to secure external timber gates, shed doors, and rustic internal doors. Featuring a timeless thumb-lever design, it allows for convenient operation from either side of the door or gate. Pressing the thumb activator on the outside lifts the gravity-fed latch bar from its keep on the inside, providing a simple and reliable closing mechanism.

Constructed for durability, this light Suffolk latch features a weather-resistant black finish, making it highly suited for outdoor environments and frequent use on garden gates. The surface-mounted components ensure a straightforward installation process, making it an ideal choice for both new projects and replacing existing hardware.

Technical Specifications

- **Brand:** Crompton
- **Manufacturer Reference:** 0020-10 (L1168)
- **Finish:** Black
- **Plate Height:** 200mm
- **Plate Width:** 45mm
- **Overall Width:** 190mm (19cm)
- **Depth:** 120mm
- **Weight:** 120g
- **Pack Quantity:** 1
- **Packaging:** Bagged

Brand Profile

Crompton

Crompton is a UK **architectural ironmongery** brand used for the practical, “fit-and-forget” hardware that lives on doors, gates, garages and windows—hinges, bolts, latches, padbolts, hasps & staples, and the assorted steel bits that quietly keep properties together.

Today, Crompton sits within the **ERA brand family** (ERA explicitly lists Crompton as one of its recognised brands), and the Crompton range is marketed through ERA’s trade channels as their dedicated **ironmongery line**.

In ERA’s own wording, the **Crompton range** covers “everything from **gate ironmongery** like **hinges, bolts and latches** to **window and garage door ironmongery**,” and it’s positioned as traditional, broadly compatible hardware suitable for **period and contemporary homes**, conversions, and commercial properties—backed by ERA’s product/quality know-how.
