Specification Summary

Brand	Crompton
Product type	Catch & Latch

Product Description

The Crompton 1136-7-10 is a classic plain ring handle gate latch designed to keep garden gates, shed doors, and external doors securely closed when not in use. Featuring a robust construction with a traditional black finish, this latch offers both practical functionality and a clean, understated aesthetic that complements a wide variety of outdoor timber gates.

This gate latch is designed for straightforward installation, where the ring handle is fixed to the opening section of the gate. When the gate is closed, the latch arm rests securely on the supplied hook plate to keep the door shut. It is an ideal, durable solution for domestic garden gates and utility sheds, providing reliable operation and weather resistance.

Technical Specifications

Brand Profile

Crompton

Crompton is a UK **architectural ironmongery** brand used for the practical, “fit-and-forget” hardware that lives on doors, gates, garages and windows—hinges, bolts, latches, padbolts, hasps & staples, and the assorted steel bits that quietly keep properties together.

Today, Crompton sits within the **ERA brand family** (ERA explicitly lists Crompton as one of its recognised brands), and the Crompton range is marketed through ERA’s trade channels as their dedicated **ironmongery line**.

In ERA’s own wording, the **Crompton range** covers “everything from **gate ironmongery** like **hinges, bolts and latches** to **window and garage door ironmongery**,” and it’s positioned as traditional, broadly compatible hardware suitable for **period and contemporary homes**, conversions, and commercial properties—backed by ERA’s product/quality know-how.
