Specification Summary

Brand	Crompton
Product type	Tower

Product Description

The Crompton 1260 is a heavy-duty, long-reach door bolt designed specifically for securing garage doors, large gates, and outbuildings. Featuring a robust mechanical sliding action, this bolt provides reliable, straightforward security to help protect your property.

Finished in a durable black coating, the Crompton 1260 is built to withstand the elements and general wear, making it ideal for outdoor and external applications. It is available in multiple lengths and weights to suit different door sizes and security requirements. Please select your preferred length and weight from the options below.

Brand Profile

Crompton

Crompton is a UK **architectural ironmongery** brand used for the practical, “fit-and-forget” hardware that lives on doors, gates, garages and windows—hinges, bolts, latches, padbolts, hasps & staples, and the assorted steel bits that quietly keep properties together.

Today, Crompton sits within the **ERA brand family** (ERA explicitly lists Crompton as one of its recognised brands), and the Crompton range is marketed through ERA’s trade channels as their dedicated **ironmongery line**.

In ERA’s own wording, the **Crompton range** covers “everything from **gate ironmongery** like **hinges, bolts and latches** to **window and garage door ironmongery**,” and it’s positioned as traditional, broadly compatible hardware suitable for **period and contemporary homes**, conversions, and commercial properties—backed by ERA’s product/quality know-how.
