Specification Summary

Brand	D&D Technologies
Product type	Truclose

Product Description

The D&D Technologies Truclose Regular Hinges are reliable, self-closing gate hinges designed specifically for wooden gates weighing up to 30kg. Constructed from a strong, UV-stabilised moulded polymer with stainless steel internal components, these hinges are highly durable, weather-resistant, and will not rust, bind, sag, or stain.

Featuring advanced tension adjustment, they allow you to easily adjust the closing speed and tension from either end to suit your gate's weight. The hinges are fully reversible to suit both left and right-handed gates, and they are supplied as a pair with optional clip-on hinge covers that conceal the fasteners for a clean, professional finish.

Technical Specifications

- **Brand:** D&D Technologies
- **Manufacturer Reference:** DD-TCA3S3RB
- **Finish:** Black
- **Material:** Moulded polymer and stainless steel
- **Gate Weight Capacity:** Up to 30kg
- **Handing:** Reversible
- **Pack Quantity:** 1 Pair

- **Weather Resistant:** Yes

Key Features

- **Self-Closing Action:** Automatically closes gates up to 30kg for enhanced convenience.
- **Adjustable Tension:** Easily adjust the closing tension and speed from either end of the hinge.
- **Corrosion Resistant:** Durable polymer and stainless steel construction ensures no rusting, binding, sagging, or staining.
- **Sleek Finish:** Supplied with optional clip-on hinge covers to hide fasteners and provide a clean, professional look.
- **Weatherproof Design:** Engineered to withstand outdoor conditions and UV exposure.

Brand Profile

D&D Technologies

D&D Technologies is an **Australian gate-hardware specialist** best known for inventing the **MagnaLatch®**—a magnetic, child-safety gate latch that became a global go-to for **pool and perimeter gate safety**. The company was **established in the late 1980s** and built its reputation on solving the annoying real-world problems of gates: rust, sag, binding, and "why is this latch suddenly possessed?"

What they make

D&D's range is essentially "everything that makes a gate behave":

- **MagnaLatch®** magnetic safety latches (including the **MagnaLatch ALERT** variants that combine a latch + alarm concept in one unit)
- **TruClose®** self-closing hinges, built with **engineering polymers + stainless components** to avoid corrosion, staining, and sagging, and designed to be adjustable and installer-friendly
- **LokkLatch®** gate latches/locks and other privacy/security gate hardware aimed at residential and light commercial perimeter security

They're strongly associated with **pool safety compliance** and family safety messaging, but they also explicitly sell **heavy-duty gate hardware** for **commercial, industrial, and automated gates**.

Where they're based / footprint

D&D lists operations in **Frenchs Forest, NSW (Australia)** and a US presence via **D&D Technologies (USA) Inc.** in **Huntington Beach, California**. Notably, their contact emails use the **assaabloy.com** domain, reflecting their current group ownership.

Ownership

As of **2 May 2024**, **ASSA ABLOY** announced it had acquired D&D Technologies, adding it to the ASSA ABLOY Opening Solutions brand portfolio.
