Brand	dormakaba
Product type	3000 Series

Product Description

The DORMAKABA 3000 Series Narrow Style Digital Lock Body Only is a high-quality replacement lock body for the dormakaba (formerly Kaba) Simplex 3000 series mechanical digital lock. Specifically engineered for narrow stile aluminium doors, this unit offers a robust and cost-effective solution for restoring or upgrading your existing access control setup without replacing the entire system.

Designed for convenience and durability, it features a protective clutch mechanism to prevent damage from forced entry attempts. The front body is non-handed (please note that the drive assembly is handed), and it features a reversible latch designed to work seamlessly with Adams Rite lock cases. Users can easily and quickly change the entry code while the unit remains fitted to the door, saving valuable maintenance time. Additionally, a key bypass function and holdback facility (via code and cylinder) provide versatile access control options for your premises.

Technical Specifications

- **Brand:** dormakaba
- **Manufacturer Reference:** 3001-26D
- **Backset:** 24mm or 28mm
- **Case Depth Required:** 44mm, 48mm or 58mm

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
