Specification Summary

Brand	dormakaba
Product type	5000 Series

Product Description

The weather-resistant dormakaba Simplex 5000 Series (formerly Kaba) is a robust, fully mechanical digital lock solution designed for high-traffic internal and external doors. Because it is completely mechanical, it eliminates the hassle and ongoing maintenance of battery replacements or electrical wiring.

This model features a convenient thumb-turn activated passage set mode, allowing free access without entering a code. This is particularly useful for busy periods or situations where frequent entry is required, such as unloading vehicles. The lock is operated via a durable 5-pushbutton keypad and supports a single access code (1 to 5 digits) with over 1,000 possible combinations. For added security and peace of mind, it includes a key override function and is supplied with two keys.

Programming is simple and can be completed from the outside without removing the lock from the door. Fully reversible on-site, this non-handed lock is suitable for both left and right-handed wood or metal doors.

Technical Specifications

- **Manufacturer Reference:** 5041XK (Part Number: L16604)
- **Backset:** 70mm
- **Case Depth Required:** 115mm
- **Door Thickness:** 35mm to 57mm
- **Finish:** Satin Chrome
- **Keypad:** 5-button mechanical keypad
- **Code Length:** 1 to 5 digits (1,000+ combinations)
- **Key Override:** Yes (supplied with 2 keys)
- **Handing:** Non-handed (reversible on-site)
- **Operation Outside:** Lever handle on code entry or by key
- **Operation Inside:** Lever handle free exit
- **Weather Resistant:** Yes

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
