Specification Summary

Brand	dormakaba
Product type	7100 Series

Product Description

The dormakaba Simplex 7102 (formerly known as Kaba) is a robust, fully mechanical digital lock designed to provide reliable keyless access control without the need for batteries or wiring. Ideal for light commercial and residential applications, this weather-resistant lock features a 70mm deadbolt that must be manually relocked, offering a secure auxiliary locking solution.

The lock is easily programmed with a single user code of 1 to 5 digits via the 5-button keypad, and code changes can be completed quickly on-door without removing the unit. It features a force-resistant, clutch-protected exterior thumbturn and vandal-resistant solid metal pushbuttons for exceptional durability. On the inside, a thumbturn provides free egress at all times. The unit is completely non-handed and field-reversible, making it suitable for both left and right-handed doors.

Technical Specifications

- **Brand:** dormakaba
- **Manufacturer Reference:** 7102-26D
- **Backset:** 70mm
- **Required Case Depth:** 98mm
- **Door Thickness:** 35mm to 57mm
- **Finish:** Satin Chrome
- **Locking Mechanism:** 70mm Deadbolt (manual relock)
- **Code Length:** 1 to 5 digits (single user code, 1,000+ combinations)
- **Handing:** Fully reversible (non-handed)
- **Key Override:** No
- **Holdback:** No
- **Weather Resistant:** Yes
- **Width:** 56mm
- **Weight:** 1.68kg
- **Guarantee:** 1 Year

Key Features

- **Fully Mechanical Operation:** Eliminates the hassle, cost, and maintenance of batteries or electrical wiring.
- **Weather-Resistant Construction:** Durable all-metal cast front housing suitable for external applications.
- **On-Door Programming:** Easily change the 1 to 5 digit access code via the keypad without removing the lock from the door.
- **Vandal-Resistant Design:** Features solid metal pushbuttons and a force-resistant, clutch-protected exterior thumbturn.
- **Convenient Egress:** Interior thumbturn allows free exit at all times.
- **Reversible Handing:** Non-handed design can be easily reversed on-site to suit both left and right-handed doors.

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
