Specification Summary

Brand	dormakaba
Product type	7100 Series

Product Description

The dormakaba 7100 Series 7104 is a robust, slimline mechanical digital lock designed for light commercial and residential applications. Utilising the highly reliable Simplex code chamber, this lock provides secure, keyless access control without the need for batteries, wiring, or complex computer programming.

This model features a deadlocking latch that automatically relocks every time the door is closed, ensuring the property remains secure. It is fully non-handed and field-reversible, making it highly versatile for installation on both left and right-handed doors. It also features a protective clutch mechanism to prevent damage from forced entry attempts, and allows for quick code changes while the unit remains fitted to the door.

The 7104 digital lock is available in multiple finishes, including Polished Brass and Satin Chrome, with corresponding manufacturer references. Please select your preferred finish and option from the selection below.

Technical Specifications

- **Brand:** dormakaba
- **Series:** 7100 Series (Model 7104)
- **Backset:** 70mm
- **Case Depth Required:** 98mm
- **Door Thickness:** Suitable for doors 35mm to 57mm thick

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
