Specification Summary

Brand	dormakaba
Product type	7100 Series

Product Description

The dormakaba Simplex 7100 Series (formerly Kaba) offers a robust, fully mechanical digital lock solution designed for light commercial and residential doors. The 7108 model features a medium-duty mortice deadbolt with a 60mm backset, providing reliable keyless security without the need for batteries or wiring.

With its durable, weather-resistant construction and solid metal pushbuttons, this digital lock is built to withstand outdoor environments. It supports a single user code of 1 to 5 digits, which can be easily changed on the door without removing the unit. The lock is non-handed and fully reversible on-site, making it suitable for both left and right-handed doors. It features a thumbturn on code entry from the outside and a thumbturn free exit from the inside, ensuring convenient and safe egress.

Technical Specifications

- **Brand:** dormakaba
- **Series:** Simplex 7100 Series (Model 7108)
- **Backset:** 60mm
- **Case Depth Required:** 98mm

- **Door Thickness:** 35mm to 57mm

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
