## Product Description

The Dormakaba 7475AX Rectangular Floor Pivot Bearing is a heavy-duty, rust-protected bottom pivot designed for use with Dormakaba BTS concealed floor springs, including the BTS80. Engineered for durability and high performance, it features an angular contact roller bearing that ensures smooth, reliable door operation even in high-traffic commercial environments.

Constructed from robust steel with a zinc-plated finish, this floor pivot bearing is built to last. It is capable of supporting heavy timber, steel, or aluminium doors with a maximum weight of up to 300kg. Its compact, rectangular design allows for a clean, low-profile installation, making it an ideal choice for demanding entryways requiring dependable architectural hardware.

## Technical Specifications

- **Brand:** dormakaba
- **Manufacturer Reference:** 7475AX
- **Material:** Steel
- **Finish:** Zinc Plated
- **Length:** 101mm
- **Width:** 45mm
- **Weight:** 310g
- **Maximum Door Weight:** 300kg
- **Compatibility:** Designed for use with Dormakaba BTS floor springs

## Key Features

- **Heavy-Duty Support:** Capable of supporting door weights up to 300kg, making it ideal for heavy-use commercial doors.
- **Smooth Operation:** Features an angular contact roller bearing to ensure smooth and reliable door rotation.
- **Corrosion Resistant:** Zinc-plated steel construction provides excellent rust protection and long-lasting durability.
- **Versatile Compatibility:** Suitable for use with timber, steel, and aluminium doors when paired with appropriate bottom straps.

## Brand Profile

dormakaba

**dormakaba** is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
