Specification Summary

Brand	dormakaba
Product type	Accessory

Product Description

The dormakaba 8550/1 Universal Side Load Floor Pivot is a high-quality accessory designed for use with transom door closers, such as the dormakaba RTS 85. Engineered for reliability and ease of installation, this floor pivot is ideal for double-action and centre-pivoted single-action doors.

A key benefit of the side-load design is the simplified installation process. The door is offered directly onto the floor pivot in the closed position, allowing the closer arm in the upper door rail to connect to the spindle and secure with a clamping piece. This eliminates the need for complex floor preparation and makes alignment straightforward.

Manufactured with a durable galvanised finish, this floor pivot is built to withstand regular use. It supports a maximum door width of 950mm and comes complete with all necessary fixings, including screws and plugs, for a hassle-free setup.

Technical Specifications

- **Brand:** dormakaba (formerly Dorma)
- **Manufacturer Reference:** 8550/1
- **Finish:** Galvanised
- **Maximum Door Width:** 950mm

- **Weight:** 218g
- **Pack Quantity:** 1

Key Features

- **Universal Side-Load Design:** Allows the door to be offered onto the floor pivot in the closed position for easier installation and alignment.
- **Transom Closer Compatibility:** Designed for use with the dormakaba RTS 85 transom door closer.
- **Supplied with Fixings:** Comes complete with screws and plugs for immediate installation.
- **Durable Construction:** Features a robust galvanised finish to ensure long-lasting performance.

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
