Brand	dormakaba
Product type	900 Series

Product Description

The dormakaba 900 Series 904 Digital Lock (formerly known as Kaba Simplex) is a robust, fully mechanical digital door lock designed for light commercial and residential applications. Because it operates entirely mechanically, it eliminates the inconvenience and ongoing maintenance costs of battery replacements and electrical wiring. This weather-resistant unit is ideal for both indoor and outdoor installations.

The 904 model is supplied with a secure rim deadbolt and must be manually relocked after entry. It features a single access code of 1 to 5 digits, providing over 1,000 possible combinations. Authorised users can change the code in

seconds without removing the lock from the door. Additionally, the unit is non-handed and fully reversible, making it highly versatile for various door configurations. It also features a protective clutch mechanism to safeguard the lock against forced entry attempts.

Technical Specifications

- **Brand:** dormakaba
- **Model:** 904 (904-0000-26D-41)
- **Backset:** 65mm
- **Case Depth Required:** 94mm
- **Door Thickness:** 44mm to 54mm
- **Lock Type:** Rim Deadbolt
- **Finish:** Satin Chrome
- **Code Length:** 1 to 5 digits
- **Number of Buttons:** 5
- **Combinations:** 1,000+

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
