Brand	dormakaba
Product type	900 Series

Product Description

The dormakaba Simplex 900 Series 938 is a robust, fully mechanical digital lock designed to provide reliable keyless access control without the hassle of batteries, wiring, or electrical connections. This weather-resistant unit is ideal for both light commercial and residential applications, featuring a key override function that allows for emergency bypass or integration into master-key systems.

Operating via a 5-button keypad, the Simplex 938 supports a single user code of 1 to 5 digits, offering over 1,000 possible combinations. Code changes are quick and straightforward, completed directly on the door without removing the unit. The lock is equipped with a reversible rim deadlatch, a protective clutch mechanism to guard against forced entry, and a convenient latch holdback feature to allow free passage when required. Suitable for doors between 44mm and 54mm thick, it offers a thumbturn for free exit from the inside and a thumbturn on entry of the code or key from the outside.

Technical Specifications

- **Brand:** dormakaba
- **Model:** 938 (900 Series)
- **Lock Type:** Rim Deadlatch
- **Backset:** 65mm
- **Case Depth Required:** 94mm
- **Door Thickness:** 44mm to 54mm
- **Key Override:** Yes (1 key supplied)
- **Code Length:** 1 to 5 digits (1,000+ combinations)
- **Handing:** Reversible (non-handed)
- **Finish:** Satin Chrome
- **Holdback:** Yes (latch holdback)
- **Weather Resistant:** Yes
- **Operation Outside:** Thumbturn on entry of code or by key

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
