Specification Summary

Brand	dormakaba
Product type	Accessory

Product Description

The dormakaba BTS Standard Spindle is a high-quality, interchangeable spindle insert designed specifically for use with the Dorma BTS80F concealed floor spring. This essential component acts as the vital connection between the floor spring closer mechanism and the door's bottom strap, ensuring smooth and reliable door operation.

As a standard spindle, it provides the basic level of clearance (8mm) for standard door installations. It is ideal for standard applications where no extra floor clearance is required. This is a loose-packed, single-unit replacement or installation part, manufactured to dormakaba's exacting standards for durability and precise fitment.

Technical Specifications

- **Brand:** dormakaba
- **Manufacturer Reference:** BTS
- **Suits Product:** Dorma BTS80F Concealed Floor Spring
- **Pack Quantity:** 1
- **Packaging:** Loose
- **Weight:** 54g

Key Features

- **Standard Clearance:** Provides the standard 8mm clearance height for typical door installations.
- **Perfect Compatibility:** Specifically designed to suit the Dorma BTS80F concealed floor spring.
- **Interchangeable Design:** Easily connects the floor spring closer mechanism to the door bottom strap.
- **Genuine dormakaba Accessory:** Manufactured to high standards, ensuring long-lasting durability and smooth operation.

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
