## Product Description

The dormakaba C-Lever Proximity Token is a secure and user-friendly contactless credential designed for use with dormakaba electronic access control systems. This compact token allows authorised users to unlock C-Lever doors with a simple tap, eliminating the need for traditional keys and enhancing both convenience and security.

With its durable housing, this proximity fob is built for long-term everyday use, making it ideal for high-traffic environments such as offices, schools, residential buildings, and healthcare facilities. It is lightweight and easy to carry on a keyring or lanyard, providing a hassle-free access control solution. Securely programmed to prevent unauthorised duplication, it supports efficient access management and integrates seamlessly with audit trail systems.

## Technical Specifications

- **Brand:** dormakaba
- **Manufacturer Reference:** 3000-1KB
- **Format:** Legic
- **Finish:** Blue & White
- **Weight:** 5g
- **Pack Quantity:** 1
- **Packaging:** Boxed

## Key Features

- **Contactless Access:** Enables quick and easy door unlocking via a simple proximity tap.
- **Keyless Convenience:** Replaces traditional mechanical keys to streamline entry.
- **High Durability:** Robust housing designed to withstand everyday wear and tear in high-traffic environments.
- **Secure Programming:** Programmed to prevent unauthorised duplication for enhanced security.
- **Easy to Carry:** Compact and lightweight design, perfect for attaching to a keyring or lanyard.
- **Versatile Application:** Suitable for commercial, educational, residential, and healthcare settings.
- **System Integration:** Designed specifically for use with dormakaba C-Lever access control systems and supports audit trail integration.

## Brand Profile

dormakaba

**dormakaba** is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
