Specification Summary

Brand	dormakaba
Product type	Floor

Product Description

The dormakaba (formerly Dorma) Cover Plate is specifically designed to suit the BTS75V floor spring door closer. This high-quality cover plate provides a neat, flush finish to your floor spring installation while protecting the internal mechanism from dust, dirt, and moisture. It also helps prevent unauthorised tampering with the closer's adjustment valves.

Designed for maximum versatility, this universal cover plate is non-handed and suitable for both single and double-action doors. For single-action applications, the pre-blanked corner sections can easily be snapped off to accommodate the bottom strap, whereas they remain intact for double-action setups. The plate can be installed or

replaced with the door in-situ, making maintenance straightforward.

This cover plate is available in a choice of finishes, weights, barcodes, and manufacturer references to match your aesthetic and technical requirements. Please select your preferred options from the choices below.

Technical Specifications

- **Compatibility:** Designed to suit dormakaba BTS75V floor spring door closers

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
