Specification Summary

Brand	dormakaba
Product type	Concealed

Product Description

The dormakaba ITS96 Concealed Door Closer is a high-quality, overhead door-closing system designed to be integrated seamlessly into the door leaf and frame. By remaining completely out of sight when the door is closed, it provides a clean, minimalist aesthetic without compromising on performance or safety. This makes it an ideal choice for premium architectural projects, commercial properties, and modern residential spaces.

Engineered for versatility, the exceptionally slender ITS96 body can be installed in virtually all doors with a leaf thickness of 40mm or more. It is fully reversible (non-handed) and suitable for doors up to 1100mm wide and weighing up to 100kg. The closer features an adjustable spring strength (power size EN 2 to 4), adjustable latch action, and a cushioned dead stop to ensure smooth, controlled closing. It is also BS EN 1154 compliant and fire-tested for up to 1 hour on timber doors and 4 hours on metal doors.

Technical Specifications

- **Brand:** dormakaba
- **Manufacturer Reference:** ITS96
- **Standards:** BS EN 1154
- **Fire Tested:** 1 hour timber & 4 hours metal doors
- **Power Size:** EN 2 to 4 (adjustable spring strength)
- **Maximum Door Width:** 1100mm
- **Maximum Door Weight:** 100kg
- **Minimum Door Leaf Thickness:** 40mm
- **Handing:** Reversible
- **Finish:** Silver
- **Dimensions:** 45mm (H) x 32mm (W) x 45mm (D)
- **Weight:** 2.802kg

Key Features

- **Concealed Installation:** Fits out of sight inside the door leaf and frame, preserving clean door aesthetics.
- **Adjustable Spring Strength:** Power size can be adjusted between EN 2 and EN 4 to suit different door sizes and site conditions.

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
