Specification Summary

Brand	dormakaba
Product type	L1000 Series

Product Description

The dormakaba (formerly Kaba) Simplex LP1000 Series is a heavy-duty, fully mechanical digital lock designed for exterior access control. This front-only unit is specifically engineered to suit surface-mounted panic latch hardware, providing a secure, keyless entry solution while allowing free egress from the inside via a pad bar or crash bar (exit device not supplied).

Because it is fully mechanical, the LP1000 eliminates the hassle and ongoing maintenance costs of battery replacements. It features a single, easily programmable access code of 1 to 5 digits, offering over 1,000 possible combinations. Code changes can be performed quickly on the door without removing the unit. For added security, the lock is equipped with a protective clutch mechanism to prevent damage to the lever handle, and is highly weather-resistant for reliable outdoor performance.

This lock is available in multiple configurations. Please choose from the options below to select your required handing (Left Hand or Right Hand) and cylinder option (either supplied complete with a cylinder and keys, or supplied without a cylinder for use with your own).

Technical Specifications

- **Brand:** dormakaba
- **Finish:** Satin Chrome
- **Handing:** Left Hand or Right Hand (please select from the options below)
- **Door Thickness:** 35mm to 57mm
- **Case Depth Required:** 127mm
- **Code Length:** 1 to 5 digits (single code, 1,000+ combinations)
- **Key Override:** Available with cylinder supplied (includes 2 keys) or without cylinder (please select from the options below)
- **Weather Resistant:** Yes
- **Guarantee:** 3 Year

Key Features

- Fully mechanical operation with no batteries or wiring required
- Designed for use with surface-mounted panic latch hardware (exit device not included)
- Fast and easy code changes while the unit remains fitted to the door
- Protective clutch mechanism safeguards the lever handle from vandalism and forced entry
- Free egress from the inside via the crash bar or pad bar
- Highly weather-resistant construction suitable for external doors

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
