Specification Summary

Brand	dormakaba
Product type	Panic Latch

Product Description

The dormakaba (formerly Dorma) PHA 3-Point Antithrust Panic Latch is a high-security, modular emergency exit solution designed for single doors up to 1000mm wide. Engineered for safety and reliability, this unit features a robust three-point locking system incorporating top and bottom bolts alongside a central anti-thrust latch. This anti-thrust mechanism prevents the latch from being forced back by unauthorised means when the door is closed, ensuring excellent security without compromising emergency egress.

This panic latch is fully certified to BS EN 1125 and carries the CE mark, making it suitable for use on escape doors in public buildings where users may not have prior knowledge of the exit layout. It features a non-handed, fully reversible design for straightforward installation on left or right-handed doors, and is suitable for use on fire and smoke check doors. Additionally, an integrated dogging device allows the latches to be held in a retracted position, enabling free access through the door during standard operating hours.

Technical Specifications

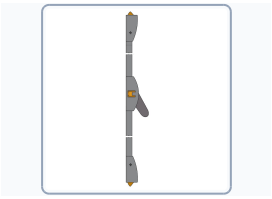

- **Brand:** dormakaba
- **Manufacturer Reference:** A40210204040301
- **Finish:** Silver

- **Max Door Width:** 1000mm
- **Handing:** Reversible (non-handed)
- **Standards:** BS EN 1125, CE Marked
- **Weight:** 4.98kg
- **Pack Quantity:** 1

Key Features

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
