Specification Summary

Brand	dormakaba
Product type	Panic Latch

Product Description

The dormakaba (formerly Dorma) PHA Antithrust Panic Latch is a high-quality, reliable emergency exit device designed for doors up to 1000mm wide. Engineered for public buildings where users may not have prior knowledge of the escape route, this panic latch provides exceptional safety and security.

A key feature of this device is the central anti-thrust latch, which prevents the latch from being forced or pushed back by unauthorised means when the door is closed. This provides an extra layer of security against intrusion while maintaining a safe, effortless exit in an emergency.

Designed with versatility in mind, the unit features a fully reversible, non-handed design and is suitable for use on fire and smoke check doors. It also includes a convenient dogging device, allowing the latch to be held in a retracted position to keep the door freely accessible during busy periods.

The dormakaba PHA panic latch is fully CE marked and certified to BS EN 1125 standards, ensuring complete compliance with UK building regulations for emergency exit hardware.

Technical Specifications

- **Brand:** dormakaba
- **Manufacturer Reference:** A40210204000001
- **Max Door Width:** 1000mm
- **Handing:** Reversible (non-handed)
- **Finish:** Silver
- **Standards:** BS EN 1125, CE Marked
- **Weight:** 2.59kg
- **Packaging:** Boxed

Key Features

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
