Specification Summary

Brand	dormakaba
Product type	Panic Latch

Product Description

The dormakaba PHA 2111 Modular Push Pad is a high-quality, single-point locking panic latch designed for emergency escape doors. Fully certified to BS EN 179 standards, this push pad is ideal for buildings where occupants are familiar with the exit routes, such as offices and private work environments, helping to ensure safe evacuation without the risk of panic. It is also fully approved for use on fire and smoke check doors.

This highly versatile, modular unit can be seamlessly integrated with components from the dormakaba PHA 2000 and PHA 3000 series. For added convenience, it can also be configured to unlock via an electric strike if fitted. Featuring a robust zinc die-cast latch and a fully reversible design, it offers flexible installation on both left and right-handed doors.

Technical Specifications

- **Standards:** CE Marked, BS EN 179
- **Handing:** Reversible
- **Max Door Width:** 1300mm
- **Max Door Height:** 2270mm
- **Max Door Weight:** 200kg
- **Body Height:** 145mm
- **Body Width:** 37mm
- **Depth:** 95mm
- **Handle Projection:** 42mm
- **Screw Centres:** 113mm
- **Finish:** Silver
- **Weight:** 1.22kg

Key Features

- **Certified Safety:** Fully compliant with BS EN 179 for emergency escape routes where occupants are familiar with the exit layout
- **Fire Rated:** Suitable for use on fire and smoke check doors

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
