Specification Summary

Brand	dormakaba
Product type	Outside Access Device

Product Description

The dormakaba PHT 06 Outside Access Device (OAD) is a robust and reliable external trim solution designed to complement dormakaba's PHA 2000 and Exit Pad series of emergency exit hardware. Finished in a clean silver, this unit provides secure, controlled access from the outside of a building while maintaining safe emergency egress from the inside.

This model features a fixed, non-turnable knob, operating on a "storeroom function". This means the external knob remains stationary, and the latch or bolt is retracted solely by operating the key in a Euro-profile cylinder (available

separately). This setup is ideal for storerooms, service areas, and back-of-house doors where restricted external entry is required.

With a fully reversible, non-handed design, the PHT 06 is easy to install on both left and right-handed doors. It is suitable for standard doors with a leaf thickness of up to 60mm and comes complete with a handle spindle and two cylinder fixing bolts.

Technical Specifications

- **Brand:** dormakaba
- **Manufacturer Reference:** PHT06
- **Finish:** Silver
- **Handing:** Reversible (non-handed)
- **Suitable Door Thickness:** Up to 60mm
- **Cylinder Compatibility:** Euro-profile single cylinder (sold separately)
- **Standards:** CE Marked
- **Weight:** 770g

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
