Specification Summary

Brand	dormakaba
Product type	1000 Series

Product Description

The dormakaba Simplex 1000 Series 1031 is a heavy-duty, fully mechanical digital lock that provides robust, keyless security without the need for batteries or wiring. This knob-operated digital lock features a single, easily programmable access code, allowing you to change the combination directly via the 5-button keypad without removing the unit from the door.

Designed for high-traffic commercial and residential environments, this model includes a thumbturn-activated free passage set mode. This feature is ideal for situations requiring frequent, unrestricted access, such as loading or unloading. Built with a weather-resistant housing and vandal-resistant solid metal buttons, it offers outstanding durability in both internal and external applications.

The lock is factory handed left but is easily field-reversible to suit both left and right-handed doors. It is available in multiple finishes, including Polished Brass and Satin Chrome, with corresponding manufacturer references. Please choose your preferred finish and options from the selection below.

Technical Specifications

- **Brand:** dormakaba
- **Backset:** 70mm
- **Case Depth Required:** 110mm
- **Door Thickness:** 35mm to 57mm
- **Code Length:** 1 to 5 digits
- **Number of Codes:** 1

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
