Specification Summary

Brand	dormakaba
Product type	Overhead

Product Description

The dormakaba TS68 is a highly reliable, cost-effective overhead door closer designed for standard internal doors in residential, commercial, and light public environments. This versatile rack-and-pinion closer is an ideal entry-level solution, offering proven performance without the need for a mounting backplate, making installation exceptionally quick and straightforward.

With a template-adjustable power size covering EN 2, 3, and 4, the TS68 can be easily tailored to suit different door widths up to 1100mm. The closing force is selected during installation by adjusting the position of the closer body and the arm's power shoe. It features two independent valves for precise control over the closing speed and latching action, ensuring a smooth and secure close every time.

For safety and compliance, the TS68 is tested to BS EN 1154 and is Certifire approved for use on timber fire doors for up to 120 minutes (FD120) when installed in the standard pull-side configuration. It is non-handed, making it suitable for both left and right-handed doors.

Technical Specifications

- **Brand:** dormakaba
- **Model:** TS68
- **Power Size:** EN 2 - 4 (adjustable via templating and power shoe)
- **Maximum Door Width:** 1100mm

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
