Specification Summary

Brand	dormakaba
Product type	Overhead

Product Description

The dormakaba TS73V (formerly Dorma) is a highly versatile and reliable overhead door closer, specifically designed for internal doors, including single- and double-leaf fire doors. Featuring a compact, flat format, it is quick and straightforward to install across a range of applications, including Fig 1, Fig 61, and Fig 66.

One of its standout features is the "thinking" backcheck, which automatically adjusts to cushion the door if it is opened forcefully, protecting both the door and the adjacent wall. The spring strength is easily adjustable between sizes EN 2 to 4 using an Allen key, allowing you to tailor the closing force to your specific door requirements. With an anti-corrosion finish, the TS73V is also suitable for use in moist or damp environments.

This non-handed, reversible door closer is Certifire approved and fully tested to BS EN 1154, offering up to 2 hours of fire protection on timber doors and up to 4 hours on metal doors.

Technical Specifications

- **Brand:** dormakaba
- **Model:** TS73V
- **Power Size:** EN 2 to 4 (adjustable via Allen key)
- **Max Door Width:** 1100mm
- **Max Door Weight:** 80kg

Brand Profile

dormakaba

dormakaba is a Swiss-headquartered global access-solutions company that builds the stuff that makes buildings actually *work*: **door hardware**, **door closers**, **automatic entrances**, **electronic access control**, and **keying/locking systems** across commercial, residential, and institutional sites. The group is based in **Rümlang (Zurich), Switzerland** and sells into **50+ countries** with a large installed base in doors, hotels, airports, offices, and public buildings.

The modern company was created through the **merger of Germany's dorma and Switzerland's Kaba**, finalized in **September 2015** (initially branded "dorma+kaba," later standardized as **dormakaba**). That merger fused two long-running lineages: **DORMA (founded 1908 in Ennepetal, Germany)** with deep door-technology roots, and **Kaba** with a long history in locking/identification (origins going back to the 19th century in Zurich).

What dormakaba is known for in the trade/spec world is the "whole doorway" approach:

- **Door hardware + control** (closers, floor springs, related hardware)
- **Entrance systems** (automatic doors, turnstiles/personnel gates depending on market)
- **Access control & identity** (credentials, electronic locking, and management layers)

Scale-wise, dormakaba reported **net sales of CHF 2.87bn** for **FY 2024/25** and **~15k employees** (15,346 cited), reflecting a genuinely large global footprint.
