Specification Summary

Brand	Eff Eff
Product type	Eff Eff

Product Description

The EFF EFF 75 Series Mortice Release with Adjustable Jaw is a high-quality electric strike designed to provide secure and reliable access control. Suitable for medium-duty applications, this mortice-fitted release is continuously rated, making it ideal for systems requiring constant power.

This model operates on 12V DC in a fail-locked (fail-secure) configuration, meaning the door remains locked in the event of a power failure. It features a fully reversible design, allowing it to be installed on both left and right-handed doors. The adjustable jaw provides up to 9mm of depth adjustment, ensuring a precise fit and smooth operation with the door latch. With a strong holding force of 675kg (1500lbs), it offers robust security for a variety of commercial and domestic settings.

Technical Specifications

- **Brand:** Eff Eff
- **Manufacturer Reference:** 75-17
- **Fitting:** Mortice
- **Operation:** Fail Locked (Fail Secure)

- **Input Voltage:** 12V DC
- **Current Consumption:** 0.27A
- **Holding Force:** 675kg / 1500lbs
- **Handing:** Reversible
- **Body Height:** 75mm
- **Faceplate Dimensions:** 175mm (H) x 32mm (W)
- **Jaw Dimensions:** 43mm (H) x 18mm (W) x 9mm (D)
- **Finish:** Grey
- **Guarantee:** 1 Year

Key Features

- **Continuously Rated:** Engineered for continuous duty cycles without overheating.
- **Adjustable Jaw:** Features an adjustable keeper to ensure perfect alignment with the latch.
- **Reversible Handing:** Suitable for both left and right-handed door installations.
- **Medium Duty Security:** Offers a robust holding force of up to 675kg (1500lbs).
- **Fail Locked Operation:** Ensures the door remains secure during a power loss.

Brand Profile

Eff Eff

effeff (often written **EFF EFF**) is a German electromechanical door-hardware brand best known for basically inventing the modern **electric strike**—the little powered latch mechanism that lets a door be released by a button, intercom, or access-control system without replacing the mechanical lock.

- **Origins:** effeff began in **1936** as a precision/electrical engineering workshop in Germany (founded by **Fritz Fuss**).
- **Big invention:** ASSA ABLOY's own materials state that **electric strikes were invented and patented by effeff in 1947**, which is why "effeff strike" is almost a generic term in some trade conversations.
- **What they make:** a full electromechanical range including **electric strikes**, **electric bolts/dropbolts**, security locks and related **escape route / egress** components—designed to bridge mechanical locking with access-control systems.

Ownership / group: effeff is part of **ASSA ABLOY** (ASSA ABLOY announced the acquisition of German effeff Fritz Fuss KGaA in **1999**).

Signature product DNA (why installers like them):

- Wide strike selection for different door types and install situations ("appropriate strike for every installation location" is literally their pitch).
- Lots of practical installer features on popular models—e.g., adjustable keep designs and system-friendly variants like the **118E** family.
